prompt = "The user is asking the following question: "{question}"

Analyze the provided image, which is a {element_type} from a research paper.

Extract the specific information relevant to the user's question.

 $\ensuremath{^*}$ This data is often in bar charts or tables. You must visually analyze them.

For Figures, After extracting numbers from a chart, meticulously double-check the chart's legend and axis labels to ensure each value is correctly assigned to its corresponding group name and dosage. Pay close attention to the order of the bars and the legend.

*For Tables, identify all the row names(First column) and coulmns names(Top few rows, 1-2). One by one mention the column names and extract all the corresponding numerical values (along with their row names).

Provide a detailed, factual summary based ONLY on the content of the image.
